Spectracom TPRO-PCI-U / TSAT-PCI-U GPS Bus Level Timing Boards

Pursuant to Spectracom's commitment to provide the most technically advanced products to our customer base, the TPRO / TSAT PCI-U boards have been upgraded to support the 66MHz bus. This new bus level product, the TPRO / TSAT PCI-U-2, is a drop-in replacement and completely backward compatible with the existing PCI-U models. Please be assured we will continue to service and support legacy products as well as stand behind any outstanding warranties. Below is a crossover matrix of both models:

REPLACEMENT SUMMARY

Current Model	New Model
TPRO-PCI- U	TPRO-PCI-U-2
TSAT-PCI-U	TSAT-PCI-U-2

Effective immediately, Spectracom is now shipping PCI-U-2 Series products that include the Spectracom Models TPRO-PCI-U-2 and TSAT-PCI-U-2. For questions regarding pricing and delivery or TPRO/TSAT-PCI-U Series lifecycle, please contact Wade Sober, Bus Level Product Manager.

Customer Support: Technical support via telephone assistance will be available during normal business hours through our Customer Service team.
