

PRODUCT DISCONTINUANCE BULLETIN

Issue Date: September 20, 2006

Products: Spectracom TPRO-PCI Timecode Reader / Generator
Spectracom TSAT-PCI GPS Timing Board

OVERVIEW

Pursuant to Spectracom's commitment to provide the most technically advanced products to our customer base, the TPRO/TSAT-PCI boards have been upgraded to support universal signaling per PCI Local Bus Specification Revision 2.3. The TPRO-PCI-U and TSAT-PCI-U now support 3.3V and 5V universal signaling. These new boards are fully functionally backward compatible with the old TPRO-PCI and TSAT-PCI.

REPLACEMENT SUMMARY

Current Model	Description	New Model	Data Sheet Link
TPRO-PCI	Timecode Reader/Generator	TPRO-PCI-U	Data Sheet
TSAT-PCI	GPS Timing Board	TSAT-PCI-U	Data Sheet

On January 1, 2007, Spectracom will discontinue the sale and manufacture of the PCI Series products that include the Spectracom Models TPRO-PCI and TSAT-PCI. These boards will continue to be available by special order for a limited time period. For pricing and delivery questions, please contact [Wade Sober](#).
